

Vishavjit Singh

+91 77430 65252 — gmail.com — LinkedIn — Github — Portfolio — Amritsar, Punjab, India

Summary

A passionate person with interest in data science, full-stack web development, and AI-driven applications. Experienced in building web apps, ML/LLM-backed tools, and production-ready APIs focused on performance and clean UX.

Skills

Languages Python, JavaScript, SQL.
Data & ML Pandas, NumPy, scikit-learn, LangChain

Tools Git, Github, Figma, Tableau, Power BI, Excel, Premiere pro.
Other REST APIs, UI/UX,

Experience

- ML Intern At Prodigy Infotech** Dec 2025 - Jan 2026
 - Implemented linear regression for house price prediction and K-means clustering for customer segmentation.
 - Developed SVM-based computer vision models for image classification, gesture recognition and food recognition tasks.
- Data science Intern At Futureinterns** Dec 2025 - Present
 - Performed data cleaning, analysis, and visualization on e-commerce, marketing, and survey datasets using Power BI, Python, and Excel to build dashboards and extract actionable business insights.
- Freelance Developer / Project Collaborator** Aug 2023 – Present
 - Developed and deployed 6+ full-stack applications using Next.js, React, Flask, and MongoDB, improving load performance by up to 35%, along with ML project with various algos.
 - Optimized API endpoints and decreasing server response latency by 20–30%.
 - Managed deployments on Vercel and Render, ensuring 99% uptime.
- Datagenics Student Society (DGSS) — Tech Head** 2024 – 2025
 - Led the technical team for society hackathons and workshops; mentored juniors on web and ML stacks.
 - Coordinated project roadmaps, code reviews and deployment pipelines for student projects.

Projects

- Seeq — AI-Powered Image and Data Query Tool** (Link)
 - Built with Next.js and React; enables natural-language queries over images and returns structured insights and highlights.
 - Integrated Neon DB for lightweight storage and GoogleAuth for sign-in.
- ML-Based Applicant Prediction System** (Link)
 - Trained multiple machine learning models (Linear Regression, Logistic Regression, Random Forest) to predict applicant outcomes with improved accuracy.
 - Built a production-ready API endpoint for model inference using Python, enabling real-time predictions.
 - Developed a responsive TypeScript-based web interface that consumes the API and displays results with a clean, user-friendly UI.
- LLM Document Parser** (Link)
 - NLP pipeline using LangChain and implementing RAG to extract insights from documents and PDFs.
 - Designed a production ready API for accuracy and fast outputs.

Education

- Schooling — Cambridge International School** 2008-2019
- Higher Secondary (Class XII) — PSEB** 2022
Score: 87%
- Guru Nanak Dev University, Amritsar** 2023 – Present
B.Sc. Computational Statistics and Data Analytics

Certificates

- Microsoft Excel Formulas and Functions: Beginner to Expert – Udemy
 - SQL — HackerRank
 - Tableau Specialization — LinkedInLearning
 - Python for Data Science and ML Essential training — LinkedInLearning
 - Power BI Essentials — LinkedInLearning
